CRITERIA: Technical Review and Evaluation of Projects 5th Round SRFB Manual 18, Appendix C

To help ensure that every project funded by the Salmon Recovery Funding Board is technically sound the Review Panel's technical advisors will note for the Review Panel and SRFB any projects they believe have low benefit to salmon, a low likelihood of being successful, and/or have costs that outweigh the anticipated benefits of the project *. The technical advisors will not otherwise rate, score, or rank projects. The Review Panel technical members will take into account that at the time of application to the SRFB, some restoration projects will not have been completely designed and some acquisition projects may not have specific parcels identified. It is expected that projects will follow BMPs, when available, and will meet any state and federal permitting requirements.

* These projects (of concern) will remain on the project lists evaluated by the Review Panel and forwards to the SRFB unless the lead entity decides to withdraw them. Only the SRFB has the authority to remove a project from the lead entity list.

For <u>restoration and protection</u> projects, the technical advisors will advise the Review Panel that a project is not technically sound and cannot be significantly improved if:	For <u>assessment</u> projects, the project will be red-flagged by the technical advisors if:
1. It is unclear there is a problem to salmonids the project is addressing.	14. It is not clear there is a problem to salmonids the project is addressing.
2. Information provided, or current understanding of the system, is not sufficient to determine the need for, or the benefit of, the project.	15. The project does not address an information need important to understanding the watershed, is not directly relevant to project development or sequencing, and will not clearly lead to beneficial projects.

Rank	Project#	Project Sponsor	Project Name	TA Reviewed, early	TA Project of Concern, early	TA Project of Concern, Sep. 7-8	TA Project of Concern, Oct. 1	** TA Project of Concern, Oct. 7 (criteria)
3.			The project is dependent on other key conditions or processes being addressed first.	16.				The methodology does not appear to be appropriate to meet the goals and objectives of the project.
4.			The project has a high cost relative to the anticipated benefits and the project sponsor and lead entity have failed to justify the costs.	17.				The project has a high cost relative to the anticipated benefits.
5.			The project does not account for the conditions or processes in the watershed.	18.				The assessment does not account for the conditions or processes in the watershed, or may be in the wrong sequence with other habitat assessment or restoration activities.
6.			The project may be in wrong sequence with other habitat protection, assessments or restoration actions in the watershed.	19.				The assessment uses a technique that has not been proven successful in past applications.
7.			The project uses a technique that has not been considered to be successful in the past.	20.				There are significant constraints to the implementation of high priority project(s) following completion of the assessment.
8.			It is unclear how the project will achieve its stated objectives.	21.				It is unclear how the assessment will achieve its stated
9.			It is unlikely that the project will achieve its stated objective.	22.				It is unlikely that the assessment will achieve its stated
10.			There is low potential for threat to habitat conditions if the protection project is not completed.	23.				In addition to applying the above criteria, the technical advisors will also advise the Review Panel if they believe the project minimally addresses a limiting life history stage or habitat type that limits salmon productivity or its main focus is to support other needs such as general education, property protection, or water supply.
11.			The project design is not adequate or the project is improperly sited.					
12.			The stewardship plan is insufficient or there is inadequate commitment to stewardship and maintenance of the project and this would likely jeopardize the project's success.					
13.			In addition to applying the above criteria, the technical advisors will also advise the Review Panel if they believe the project has not been shown to address an important habitat condition or watershed process in the area or if the project's main focus is to support other needs such as general education, property protection or water supply.
